

The Specialist Committee on Assessment of Ocean Environmental Issues

Committee Chairman: Dr. Chang-Gu Kang

Session Chairman: Prof. Takeshi Kinoshita

1. DISCUSSIONS

1.1 Discussion to the 24th ITTC Specialist Committee on Assessment of Ocean Environmental Issues by Neil Bose, Memorial University of Newfoundland, Canada

The work done by the Specialist Committee on Assessment of Ocean Environmental Issues has shown that there are important areas where the testing tank community expertise is needed such as in the testing of underwater vehicles and other ocean equipment. It seems that for such a new area for the ITTC, the work of this Specialist Committee should be continued at

least for one more term, to monitor progress in this area and its implications to the Towing Tank Community.

2. COMMITTEE REPLIES

2.1 Reply of the 24th ITTC Specialist Committee on Assessment of Ocean Environmental Issues to Neil Bose

The Committee would like to thank Prof. Bose for his discussion and acknowledge the value of his suggestion. We hope that the ITTC will consider ocean environmental issues in its future deliberations.
